ARTICLE 19 - MUNICIPAL ELECTRICAL AGGREGATION

This article would allow the Town to initiate the process to create a municipal electrical aggregation program for the residents of Dunstable. Municipal aggregation is the process by which a municipality purchases electricity in bulk from a competitive supplier on behalf of the residents and businesses within the community. It allows communities to determine where its electricity comes from.

Most residents and businesses currently get electricity supply, referred to as basic service, from their electric utility (in Dunstable, National Grid). Under state law, however, a municipal aggregation program allows communities to competitively bid and purchase electricity in bulk for Town residents, and the utility continues to deliver the electricity, maintain poles and wires, and provide other customer services. Customers would still receive a single electricity bill.
