WARNING

Leaving Your Pet In A Parked Car Can Be A Deadly Mistake

On a warm day, the temperature in a parked car can reach 160° in a matter of minutes, even with partially opened windows.

With only hot air to breathe, your pet can quickly suffer brain damage or die from heatstroke.

Signs of heat stress: heavy panting, glazed eyes, rapid pulse, dizziness, vomiting, deep red or purple tongue.

If your pet gets overheated, you must lower his body temperature immediately!

- Get him into shade and apply cool (not cold) water all over his body.
- Apply ice packs or cold towels only to head, neck and chest.
- Let him drink small amounts of cool water, or lick ice cubes or ice cream.
- Get your pet to a veterinarian right away—it could save his life.

On hot days, your pet is safer at home!
